Waste Management Position

Water emissions: Moorim Paper operates a three step waste water treatment system, the three steps involve: chemical treatment, micro-organism treatment, and penton treatment. In addition, Moorim Paper also recycles purified wastewater.

Air emissions: Moorim Paper aims to create a chimneyless mill or smoke free plant causing no air pollution through the utilisation of steam energy from their cogeneration plant. Presently, they invest highly in order to reduce both noise and air pollution.

Solid waste land filled:

Energy usage: Moorim Paper utilises steam for energy sourced from its own cogeneration plant and has also concluded a Voluntary Agreement for energy conservation.
